PROFESSIONAL SUMMARY

Aspiring Python and Full-Stack Web Developer with hands-on experience building web applications using Python, Django, React, and relational databases. Experienced in developing full-stack projects, implementing REST APIs, database operations, and responsive user interfaces. Passionate about problem-solving, learning new technologies, and building practical software solutions.

EDUCATION

Bachelor of Computer Application (BCA) — 2023 – Present

Kathmandu Business Campus

Currently pursuing a BCA, studying programming, web development, database management, and software engineering.

+2 – Higher Secondary Education (Management) — 2021 – 2023

Gyanamandir Secondary English School

Completed higher secondary education in the Management stream with Computer Science as a major subject.

PROJECTS

1. Sociala – Social Networking Platform

Technologies: *React, JavaScript, Django, PostgreSQL, REST APIs*

A full-stack social networking platform developed using React and Django that allows users to connect, share content, and interact with other users.

Key Features:

- Implemented user authentication and profile management.
- Enabled users to create and manage posts.
- Implemented post reactions and commenting functionality.
- Developed user and post search functionality.
- Added follow functionality to connect users and build social networks.
- Integrated React frontend with Django backend through REST APIs.

GitHub: https://github.com/prasannaadhikari2602/Sociala

2. Leave Management System

Technologies: *Python, Django REST Framework, React, TypeScript, PostgreSQL, Tailwind CSS, JWT*

A full-stack leave management application designed to simplify employee leave requests and approval workflows within an organization.

Key Features:

- Implemented Role-Based Access Control (RBAC) for Admin, Manager, and Employee roles.
- Enabled employees to apply for leave, view leave balances, track request status, and cancel eligible requests.
- Provided managers with functionality to review team leave requests and approve or reject them.
- Developed administrative features to manage users, departments, leave types, and leave policies.
- Implemented leave request management and approval workflows.

GitHub: https://github.com/prasannaadhikari2602/leave-management-portal

3. Inventory Management System – Academic Project

Technologies: *HTML*, *CSS*, *JavaScript*, *PHP*, *MySQL*

An academic full-stack web application developed to manage product and inventory records efficiently.

Key Features:

- Implemented CRUD operations for managing products, stock, and inventory records.
- Developed a responsive frontend using HTML, CSS, and JavaScript.
- Integrated PHP backend logic with MySQL for data storage and management.
- Applied database operations to maintain and retrieve inventory information.

ACHIEVEMENTS

- Successfully developed multiple web development projects using Python, Django, React, PHP, and MySQL.
- Built a full-stack social networking platform with post interactions, search, and follow functionality.
- Developed a role-based Leave Management System with employee and manager approval workflows.
- Gained practical experience in frontend and backend integration, REST APIs, and relational database management.

TRAINING & CERTIFICATIONS

Full Stack Python Course **Oct, 2026**

Mind Risers Institute of Technology

- Successfully completed a 3-month Full Stack Python Course.
- Issued Date: 09 October 2026
- Certificate Number: MR-83051-FSP
- Website: https://mindrisers.com.np

TECHNICAL SKILLS

Frontend Development	HTML5, CSS3, JavaScript, TypeScript, React.js, Tailwind CSS
Backend Development	Python, Django, Django REST Framework, REST APIs, PHP (Basic)
Database	PostgreSQL, MySQL, SQLite3, Database Design, CRUD Operations
Tools & Concepts	Git, GitHub, JWT Authentication, Role-Based Access Control (RBAC), Responsive Web Design

LANGUAGE

English, Nepali
