## Summary

Motivated Python Developer with knowledge of Python, Django, web development, and relational databases. Developed projects including an Inventory Management System, a Recipe Management CRUD Application, and a personal portfolio website. Possesses strong analytical and problem-solving skills with a passion for backend development and continuous learning. Seeking a Python Internship to apply technical skills, collaborate with development teams, and gain practical industry experience.

## Education

2023 – Present

**Bachelor of Computer Application (BCA),** *Kathmandu Business Campus*
Currently pursuing a Bachelor of Computer Application (BCA) with a focus on core computer science and software development concepts. Studying subjects such as programming, web development, database management, and software engineering.

2021 – 2023

**+2 (Higher Secondary Education),** *Gyanamandir Secondary English School*
Completed higher secondary education in the Management stream with Computer Science as a major subject. Studied fundamentals of programming, computer systems, and information technology along with management and business subjects.

## Skills

**Frontend Development**
HTML, CSS, JavaScript, Tailwind CSS, React.js

**Backend Development**
Python, Django, REST APIs (basic), PHP (basic)

**Database**
MySQL, Database Design, CRUD Operations

## Projects

**Recipe App,** *Django-Based Recipe Management Application*
- Built a basic Django CRUD Recipe Application using SQLite3 as the database.
- Implemented Create, Read, Update, and Delete functionality for managing recipes.
- Designed and developed simple user interfaces for better user experience.
- Used Django ORM for efficient database operations and management.

**Portfolio,** *React-Based Responsive Personal Portfolio Website*
- Designed and developed a responsive personal portfolio website using React.
- Showcased technical skills, projects, and educational background in a structured layout.
- Created reusable React components to improve maintainability and scalability.
- Implemented responsive design for better performance across devices.

**Inventory Management System,** *Academic Full-Stack Web Application*
- Built an Inventory Management System as an academic project using HTML, CSS, JavaScript, PHP, and MySQL.
- Implemented CRUD functionality for managing products, stock, and inventory records.
- Developed a responsive frontend using HTML, CSS, and JavaScript for better user experience.
- Used PHP for backend logic and MySQL for efficient data storage and management.
- Gained hands-on experience in full-stack web development and database integration.
